

[Import CSV file into Table](#) – shows you how to import CSV file into a table.

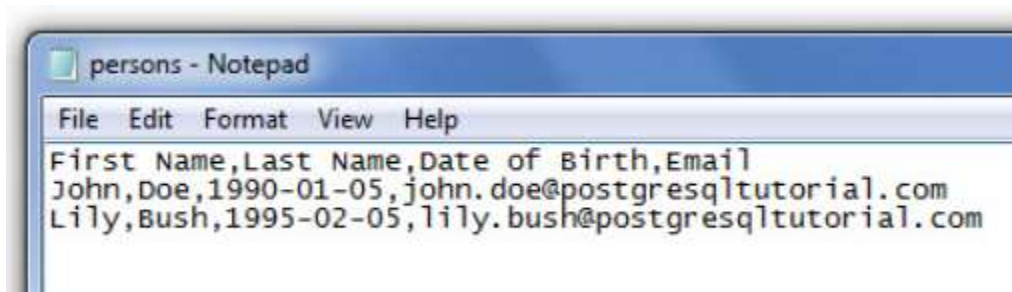

PostgreSQL IMPORT CSV statement:

Syntax Following:

```
COPY table (column1, column2, ...)  
FROM 'path' DELIMITER ',' CSV HEADER;
```

Example:

```
CREATE TABLE persons  
(  
    id serial NOT NULL,  
    first_name character varying (50),  
    last_name character varying (50),  
    dob date,  
    email character varying (255),  
    CONSTRAINT persons_pkey PRIMARY KEY (id)  
)
```

Save File on C:\tmp\persons.csv

Import CSV file into a table using COPY statement

```
COPY persons (first_name, last_name, dob, email)  
FROM 'C:\tmp\persons.csv' DELIMITER ',' CSV HEADER;
```

PostgreSQL gives back the following message:

```
Message  
[SQL]COPY persons(first_name,last_name,dob,email)  
FROM 'C:\tmp\persons.csv' DELIMITER ',' CSV HEADER;  
  
Time: 0.007s  
Affected rows: 2
```

[Import CSV file into Table](#) – shows you how to import CSV file into a table.

Let's check the `persons` table.

```
1 SELECT * FROM persons;
```

id	first_name	last_name	dob	email
1	John	Doe	1990-01-05	john.doe@postgresqutorial.com
2	Lily	Bush	1995-02-05	lily.bush@postgresqutorial.com
